## Automation systems for garage doors

Empowered by  
**U-LINK**

\* corsa utile / usable travel / course utile / nutzhub / carrera útil / werkslag

Electromechanical operators for intensive/very intensive use, designed for the automation of sectional garage doors. Features a very compact design, suitable for installation in any situation, thanks to the wide range of chain rails available in various lengths. The control unit and limit switch with encoder with mechanical stop are incorporated in the operator and rail respectively. The intensity of use makes them suitable for any type of installation, both residential and municipal. The quick Set-Up function from the ground makes installation fast and easy. The high opening speed minimises waiting times and maximises comfort for the end user. The exclusive anti-intruder function (SMART models) secures the garage from unwanted accesses.

### Relevant features

**Fast and powerful motors:** fast opening to minimise waiting times and intensive use of the automation for all types of application

**Improved fast mechanical installation:** by even just one person thanks to the new rapid Autoset procedure.

**Encoder and exclusive D-Track force management system:** for safe installation in all conditions.

## Automation systems for garage doors

## BOTTICELLI SMART BT A

Code	Name	Description
P915211 00002	<b>BOTTICELLI BT A 650</b>	24 V operator for sectional garage doors with tractive force 60 kg and intensive use. Max door surface area 10 m <sup>2</sup> . Opening speed 210 mm/sec. D-Track
P915212 00002	<b>BOTTICELLI SMART BT A 850</b>	24 V operator for sectional garage doors with tractive force 80 kg and intensive use. Max door surface area 13 m <sup>2</sup> . Opening speed 210 mm/sec. D-Track Exclusive anti-intruder function. 
P915213 00002	<b>BOTTICELLI SMART BT A 1250</b>	24 V operator for sectional garage doors with tractive force 120 kg and very intensive use. Max door surface area 16 m <sup>2</sup> . Opening speed 190 mm/sec. D-Track Exclusive anti-intruder function. 
R915152 00004	<b>BOTTICELLI BT A850 KIT</b>	 Kit for non-reversible sectional garage doors with tractive force 850 N and intensive usage. Door surface area 13 m <sup>2</sup> . Opening speed 210 mm/sec. Chain rail in three pieces, length 2900 mm, effective travel 2400 mm. The exclusive package also contains the rail in 3 pieces.

### VENERE BT A ETD: Control unit with electronic trimmer-dip switch for 1 x 24 V operator for garage doors

VENERE BT A ETD - **Cp** OPAVENERE BT A - **Ci** OPAVENERE BT A - Built-in - (Spare part code, available for order through the Technical Support network)

- Control unit with electronic trimmer-dip switch for 1 x 24 V operator for garage doors
- Board power supply: 230V single-phase
- Power supply to motor and accessories: 24 V
- Main features: integrated two-channel receiver, D-Track anti-crushing system, soft opening and closing
- Main functions: automatic re-closing, automatic torque control
- Programming with electronic trimmer-dip switch (shown on display)

### VENERE BT A DIS: Control unit with display for 1 x 24 V operator for garage doors

VENERE BT A DIS - **Cp** OPAVENERE SMART BT A - **Ci** OPAVENERE SMART BT A - Built-in - (Spare part code, available for order through the Technical Support network)

- Control unit with display for 1 x 24 V operator for garage doors
- Panel power supply: 230 V, single-phase
- Power supply to motor and accessories: 24 V
- Main features: built-in four-channel receiver, D-Track anti-crushing system, soft opening and closing
- Main functions: automatic re-closing, automatic torque control
- Programming with display
- U-Link protocol
- Exclusive anti-intruder function.

Automation systems for garage doors

## What is U-Link?

The technology that gives you more power

U-Link, Universal Link, is an exclusive BFT platform that can be used to create high-tech ecosystems. In Home Access Automation, it can be used to communicate with all home access automation devices of any brand. This saves you time and allows you to control everything easily and without any worries.

### It is intuitive

Easy to install and to use

### It is scalable

You can add as many devices as you want

### It is flexible

It allows you to create groups of interconnected products

### It is practical

Works with or without an internet connection

### It is functional

Its settings can be controlled remotely using dedicated applications

## Automation systems for garage doors

## Everything on one screen: find out more about this amazing technology

A world-exclusive platform that **can be used to create high-tech ecosystems** offering a vast range of solutions for many different sectors.

This proprietary platform which is a key feature of BFT products, thanks to the B-EBA cards and the Clonix U-Link receiver, is suitable for any protocol or product for access automation (including BFT products non-BFT ones and older versions) and it can be used in a variety of different sectors. This means any device becomes a smart device which can be interconnected with other systems, using a language that is becoming universal.

### U-Control HOME

U-Control HOME is the application that allows you to open the gate to your home and to remotely control BFT automations using your own smartphone. The iOS version can be used to automatically open the automation when you are close to it.

### U-Base 2

A software package for installation, performing maintenance and identifying any faults in the U-Link compatible operators, easily and conveniently.

### U-SDK

U-SDK is the application which allows BFT automations to be made compatible and easily integrated with a BMS network.

### Clonix U-Link

Connect non-native U-Link and non-BFT products to U-Link systems.

Is it possible to connect non-native U-Link BFT operators or other brands of products to U-Link? Yes, thanks to the Clonix receivers. Accessories which accept no limits.

### B-EBA

A direct link to your operators.

The B-EBA expansion cards make it possible to connect external devices such as PCs, smartphones and tablets to a BFT operator and a Clonix receiver or to connect multiple BFT products in a U-Link network. These accessories integrate with U-Link technology and with Bluetooth, Wifi, Z-Wave and TCP/IP protocols as well as with the RS485 serial interface. A device that demonstrates exactly what BFT means by interconnectivity.
