TIZIANO

Automation systems for garage doors

Just 13 cm thick, the TIZIANO is one of the most compact operators on the market and can be installed in any architectural context. Thanks to the built-in radio receiver in the control unit, TIZIANO can store the code for 10 MITTO or KLEIO series remote controls and/or wireless control systems such as MIMEPAD or T-BOX.

Relevant features

Anti-break-in blocking system: The exclusive rail-carriage system allows the door to be locked in the closed position even after emergency manual closing.

d-track

D-TRACK: Safety first. This is the basic principle behind all BFT operators, and therefore also the TIZIANO. In fact, the intelligent D-Track movement control system enables the microprocessor to know the exact position and speed of the door at any time, thus guaranteeing absolute perfection in movement, the safest and most reliable anti-crushing system on the market, and automatic adaptation to weather conditions and door wear.

Encoder limit switches: Encoder and D-Track combined in a single operator. The technological level and reliability of the system have made it possible to do away with external stops while still guaranteeing maximum door stopping and positioning precision.

Automation systems for garage doors

TIZIANO

Code	Name	Description
P915199 00002	TIZIANO B GDA 260 501	Operator for sectional garage doors with tractive force 60 kg and Semi intensive use. Door surface area 10 m ² . Opening speed 6.6 m/min. D-Track
R935024 70001	TIZIANO 3.5 CHAIN KIT	Kit for non-reversible sectional garage doors with Semi intensive usage. Door surface area 10 m ² . Opening speed 10 m ² . D-Track

VENERE M B GDA: Control panel for one 24 V operator for garage doors

VENERE M B GDA - **Cp** I700071 10001 - **Ci** I700071 10001 - Built-in - (Spare part code, available for order through the Technical Support network)

- Control panel for one 24 V operator for garage doors
- Application: control unit for 1 x 24 V garage door operator
- Card power supply: 230 V single-phase
- Operator power supply: 24V 100W
- Main features: dip-switch programming and potentiometers, incorporated dual channel receiver, D-Track anti-crushing system, slowdown during opening and closing
- Main functions: automatic re-closing, automatic torque control

	TIZIANO B GDA 260 501
Control unit	VENERE B GDA
Nominal voltage	24 V
Power consumption	100 W
Max. door/gate weight	60 kg
Door surface area	10 m ²
Gate panel speed	6,60 m/min
Type of limit switch	encoder
Slowdown	Yes
Locking	Mechanical
Release	Steel cord or cable
Impact reaction	D-Track
Frequency of use	Semi intensive
Protection rating	IPX0
Environmental conditions	-20 ÷ 60 °C

What is U-Link?

The technology that gives you more power

U-Link, Universal Link, is an exclusive BFT platform that can be used to create high-tech ecosystems. In Home Access Automation, it can be used to communicate with all home access automation devices of any brand. This saves you time and allows you to control everything easily and without any worries.

It is intuitive

Easy to install and to use

It is scalable

You can add as many devices as you want

It is flexible

It allows you to create groups of interconnected products

It is practical

Works with or without an internet connection

It is functional

Its settings can be controlled remotely using dedicated applications

Automation systems for garage doors

Everything on one screen: find out more about this amazing technology

A world-exclusive platform that **can be used to create high-tech ecosystems** offering a vast range of solutions for many different sectors.

This proprietary platform which is a key feature of BFT products, thanks to the B-EBA cards and the Clonix U-Link receiver, is suitable for any protocol or product for access automation (including BFT products non-BFT ones and older versions) and it can be used in a variety of different sectors. This means any device becomes a smart device which can be interconnected with other systems, using a language that is becoming universal.

U-Control HOME

U-Control HOME is the application that allows you to open the gate to your home and to remotely control BFT automations using your own smartphone. The iOS version can be used to automatically open the automation when you are close to it.

U-Base 2

A software package for installation, performing maintenance and identifying any faults in the U-Link compatible operators, easily and conveniently.

U-SDK

U-SDK is the application which allows BFT automations to be made compatible and easily integrated with a BMS network.

Clonix U-Link

Connect non-native U-Link and non-BFT products to U-Link systems.

Is it possible to connect non-native U-Link BFT operators or other brands of products to U-Link? Yes, thanks to the Clonix receivers. Accessories which accept no limits.

B-EBA

A direct link to your operators.

The B-EBA expansion cards make it possible to connect external devices such as PCs, smartphones and tablets to a BFT operator and a Clonix receiver or to connect multiple BFT products in a U-Link network. These accessories integrate with U-Link technology and with Bluetooth, Wifi, Z-Wave and TCP/IP protocols as well as with the RS485 serial interface. A device that demonstrates exactly what BFT means by interconnectivity.
